Chapter 21 - Neuromuscular system disorders. The nervous system can be considered a reflex arc designed for analyzing the environment through sensation and then modifying the environment through movement.

Chapter 21 - Neuromuscular system disorders

Pulmonary ventilation is the act of breathing, which can be described as the movement of air into and out of the lungs. The major mechanisms that drive pulmonary ventilation are atmospheric pressure (P_{atm}); the air pressure within the alveoli, called alveolar pressure (P_{alv}); and the pressure within the pleural cavity, called intrapleural pressure (P_{ip}).

National Coverage Determinations (NCDs) by Chapter/Section ...

C. Ventilation systems generally involve a combination of these types of systems. For example, a large local exhaust system may also serve as a dilution system, and the HVAC system may serve as a makeup air system (see Appendix III:3-1 for a primer and Appendix III:3-2 for an explanation of these terms).. II.
